

Buying a Car

Dalton and Breanne
L-4 March 24

The Car. Bruh.

The cost of our car was \$14,989 it comes in all colors. The Jeep Wrangler has a long history with drivers who are not afraid of getting a little mud on their tires. If you are more at home fording rivers than navigating weekend mall traffic, you will want to know more about the Wrangler. With knobby tires, four-wheel drive, and a high ground clearance, it can go where other SUVs fear to tread.

Our Financial Profile

My credit score was 740 it was excellent on the paper we got. There is no real disadvantages of having great credit. I chose 5 years so it would cost less every month. My cost of credit is 3,052.42. $16,725.59 \times .0365 \times 5 =$ Our cost of credit.

The Budget

The monthly payment fits great into our budget. We did not have to make any adjustments to our budget because we have a great credit score and balanced our budget out.
